To The Governors and Trustees of LEGADEL

When a client is referred to Mi K'amcho our first step is to look into his history, we look as far back as his early primary school years. A significant percentage of the Primary School teachers that we have been in contact with, admit that they noticed something wasn't quite right with our client but couldn't pin point the problem and due to lack of support and/or capabilities the problem was overlooked. We were therefore very excited to learn about the opening of Legadel and have followed its progress ever since.

We all know that unresolved problems only intensify and grow into bigger issues and therefore believe that if Legadel is able to spot and deal with these issues at an early stage of a child's school life, it would decrease the number of dropouts, and us at Mi K'amcho and likeminded organizations will have far fewer problems to deal with.

We wish your organization much success in this essential endeavour.

Kind Regards

Rabbi B. Denderowicz

Director
